ABOUT ME

As a skilled front-end developer specializing in React JS,I am Enthusiastic about crafting dynamic and user friendly web applications.
My expertise lies in creating responsive designs,Implementing complex Functionalities,and optimizing website performance.
I firmly believe that a positive user experience is crucial in any web application ,and I am committed to designing interface that are both Intuitive and easy to use.Furthermore,I am dedicated to staying up-to-date with the latest industry technologies and best practices,continually expanding my knowledge and honing my skills.

RESPONSIBILITY

- I developed a responsive e-commerce website using react.js that includes user authentication,shopping cart functionality,and product search
- In addition,I created a weather app that utilize React.js the open Weather API,and the Geolocation API to display real-time weather information based on the user's location.
